

Lifespan Development

PRACTICE TEST 3

KEY

Name _____

1. Eye color is in which part of the eye:

- a. iris
- b. lens
- c. cornea
- d. retina

2. Bystander effect has to do with the likelihood of:

- a. making vocational choices
- b. evaluate personalities
- c. helping others
- d. falling in love

3. Holland's social environment includes people who like to:

- a. value solving social problems
- b. avoid machines
- c. teach
- d. all of the above.

4. Knowing how to do something even if you can't explain it is called:

- a. retrospective memory
- b. declarative memory
- c. long-term memory
- d. implicit memory

5. Long-term exhaustion and diminished interest in work are symptoms of:

- a. sandwich generations
- b. unresolved conflicts
- c. multiple sclerosis
- d. burnout

6. Who is associated with the false assumptions of childhood:

- a. Sternberg
- b. Vigotsky
- c. Piaget
- d. Gould

7. The fundamental part of Fundamental Attribution Theory is our emphasis on:

- a. basic personality types
- b. passion and intimacy
- c. estrogen therapy
- d. realistic love

8. Holland's environments were used to describe:

- a. interpersonal sensitivities
- b. stages of happiness
- c. coping strategies
- d. personalities

9. Which is a "net" of neurons and light receptors:

- a. aqueous humor
- b. choroid
- c. sclera
- d. retina

10. Lee's theory of love is composed of a:

- a. triangle
- b. square
- c. wheel
- d. cube

11. A fundamental attribution error is seeing people as:

- a. all bad or all good
- b. intellectually fluid
- c. political pons
- d. burnt out

12. Balancing costs and benefits is part of:

- a. proportional awareness
- b. rational choice theory
- c. triangular analysis
- d. down-regulation

13. The long protocol of IVF includes:

- a. vaginal transplantation
- b. embryo certification
- c. down-regulation
- d. all of the above

14. Test-tube babies are actually from:

- a. synthetic in vitro fertilization
- b. natural in vitro fertilization
- c. systematic desensitization
- d. gender reassignment

15. Lack of emotion is a positive symptom of:

- a. schizophrenia
- b. Alzheimer's
- c. Parkinson's
- d. none of the above

16. The Triangular Theory of Love is composed of:

- a. passion, commitment and infatuation
- b. passion, commitment and romance
- c. passion, commitment and intimacy
- d. passion, commitment and desire

17. Sternberg describe the style of love as being the shape of a:

- a. triangle
- b. square
- c. wheel
- d. cube

18. Eros and Hudos are part of which theory of love:

- a. Thorndike's investment model
- b. Sternberg's triangular model
- c. Gould's secondary analysis
- d. Lee's color wheel

19. Astigmatism is from a misshaped:

- a. Schlemm's canal
- b. cornea
- c. pupil
- d. lens

20. The eye focuses the light through the lens and onto the:

- a. zonules
- b. eye lid
- c. fovea
- d. pons

21. Hot flashes and lowered estrogen indicate the approach of:

- a. menopause
- b. glaucoma
- c. dementia
- d. puberty

22. Which is the term for not having menstrual periods:

- a. down-regulation
- b. up-regulation
- c. osteoporosis
- d. amenorrhea

23. Who is associated with positive regard for self:

- a. Erikson
- b. Skinner
- c. Rogers
- d. Freud

24. To see is someone is dead, you might use a feather or mirror if you don't have a:

- a. heart-lung machine
- b. stethoscope
- c. microscope
- d. telescope

25. The costs of leaving and the benefits of staying are part of the:

- a. Rubin's liking-loving theory
- b. Investment Model of Love
- c. Exposure Theory of Love
- d. similarity theory of love

26. Decreases internal temperature after death is called:

- a. pallor mortis
- b. algor mortis
- c. rigor mortis
- d. livor mortis

27. Major depression is more common in:

- a. children
- b. women
- c. men
- d. equally men and women

28. Yellow deposits grow between the retina and its blood supply cause:

- a. macular degeneration
- b. retinal discrepancy
- c. fovea falsification
- d. glaucoma

29. Remembering to put on your parachute before jumping out of a plane is:

- a. prospective memory
- b. procedural memory
- c. episodic memory
- d. iconic memory

30. When can body organs be harvested for transplanted:

- a. permanent vegetative state
- b. persistent vegetative state
- c. clinically dead
- d. brain dead

31. What you sacrifice for the relationship is called:

- a. investment
- b. rewards
- c. burnout
- d. dreams

32. Which is a false assumption of childhood:

- a. "I'm going to die when I'm young"
- b. "My parents will always be there"
- c. "Dogs are better than cats"
- d. "I won't grow up"

33. Mood disorders tend to be:
- a. more common in men
 - c. quickly diagnosed
 - d. easily cured
 - d. episodic
34. Which is a dip in the retina:
- a. aqueous humor
 - b. macula
 - c. cornea
 - d. lens
35. Those is the “sandwiched generation” care for:
- a. their parents and grandparents
 - b. their parents and children
 - c. their children and grandchildren
 - d. themselves and neighbors
36. A love map contains information about:
- a. your partner’s dreams and hopes:
 - b. micro grids of communication
 - c. the color wheel of love
 - d. emotional investment
37. In dim light, which dilates:
- a. cornea
 - b. retina
 - c. pupil
 - d. lens
38. 80-year-olds don’t see as well as teens during:
- a. bright sunlight
 - b. daylight
 - c. dim light
 - d. night vision
39. The vitreous humor can acquire:
- a. luminescence
 - b. floaters
 - c. cataract
 - d. mumps
40. Low levels of dopamine cause symptoms of:
- a. Huntington’s
 - b. Alzheimer’s
 - c. Parkinson’s
 - d. menopause
41. Holland’s environments are intended to predict:
- a. computational theories of love
 - b. sensory deprivation
 - c. vocational choice
 - d. dispensations
42. Humanism was a reaction to:
- a. psychodynamic theory
 - b. Freudianism
 - c. behaviorism
 - d. trait theory
43. A typical symptom of Parkinson’s is:
- a. enhanced sense of smell
 - b. quick movements
 - c. angry outbursts
 - d. resting tremors
44. In Alzheimer’s the brain often has:
- a. lateralized hemispheres
 - b. extensive ridges
 - c. neural tangles
 - d. zonules
45. The Marshmallow Study investigated:
- a. symbolized experiences
 - b. delayed gratification
 - c. conservation
 - d. assimilation
46. What is used to reduce hot flashes:
- a. testosterone therapy
 - b. dopamine therapy
 - c. estrogen therapy
 - d. herbal therapy
47. Bleeding in the brain is called a(n):
- a. hemorrhagic stroke
 - b. ideomotor apraxia
 - c. aphasia
 - d. floater
48. Primary osteoporosis gets worse:
- a. before menopause
 - b. after menopause
 - c. before puberty
 - d. after senility
49. A cloudy lens is called:
- a. macular degeneration
 - b. glaucoma
 - c. choroids
 - d. cataract
50. High blood pressure is a risk factor for:
- a. high bone density
 - b. slow heart rate
 - c. neural plaque
 - d. stroke
